

Brookfield Infrastructure Income Fund

As of June 30, 2025

INVESTMENT PRODUCTS: NOT FDIC INSURED | MAY LOSE VALUE | NOT BANK GUARANTEED

A FUND'S INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES MUST BE CONSIDERED CAREFULLY BEFORE INVESTING. THE PROSPECTUS CONTAINS THIS AND OTHER IMPORTANT INFORMATION ABOUT THE INVESTMENT COMPANY. READ THE PROSPECTUS CAREFULLY BEFORE INVESTING. INVESTING INVOLVES RISK, AND PRINCIPAL LOSS IS POSSIBLE.

U.S. HYDRO (SMOKY MOUNTAIN)

Important Information

RISK FACTORS

An investment in shares of the Brookfield Infrastructure Income Fund Inc. ("BII") involves a high degree of risk. These shares should only be purchased if you can afford to lose your complete investment. Please read BII's prospectus for a description of the material risks associated with an investment in BII. These risks include but are not limited to the following:

BII is a newly organized, non-diversified, closed-end management investment company. BII has a limited history of operations and is subject to all of the business risks and uncertainties associated with any new business. As a result, prospective investors have a limited track record or history on which to base their investment decisions. BII is designed for long-term investors.

There is no assurance that Brookfield Asset Management Private Institutional Capital Adviser (Canada), L.P., BII's investment adviser ("Adviser"), will be able to successfully implement BII's investment strategy, or that its investments will generate expected returns. Moreover, the Adviser cannot provide assurance that any shareholder will receive a return of its capital or any distribution from BII or be able to withdraw from BII within a specific period of time. Past performance of investment entities associated with Brookfield, the Adviser or its investment professionals is not necessarily indicative of future results or performance and there can be no assurance that BII will achieve comparable results. Accordingly, investors should draw no conclusions from the performance of any other investments of Brookfield or the Adviser, and should not expect to achieve similar results. An investment in the Fund involves a risk of partial or total loss of capital and should only be considered by potential investors with high tolerance for risk.

BII has only made limited investments to date, and you will not have the opportunity to evaluate its future investments before BII makes them.

The shares have no history of public trading, nor is it currently intended that the shares will be listed on a public exchange or any other trading

market in the near future. No organized secondary market is expected to develop for the shares, and liquidity for the shares is expected to be provided only through quarterly tender offers of the shares at net asset value ("NAV") per share. There is no guarantee that repurchases will occur or that an investor will be able to sell all the shares that the investor desires to sell in a tender offer. Due to these restrictions, an investor should consider an investment in BII to be illiquid. Investing in the shares may be speculative and involves a high degree of risk, including the risks associated with leverage.

BII intends to distribute substantially all of its net investment income to shareholders in the form of distributions. Under normal market conditions, BII intends to declare and pay distributions monthly to shareholders of record. In addition, BII intends to distribute any net capital gains earned from the sale of portfolio securities to shareholders no less frequently than annually, although net short-term capital gains may be paid more frequently. BII cannot guarantee that it will make distributions, and the amount of distributions that BII may pay, if any, is uncertain.

Subscription and repurchase prices for shares of BII will generally be based on the NAV at close of business on the last business day of the immediately preceding month (subject to material changes as described in the prospectus) and will not be based on any public trading market. Rapidly changing market conditions or material events may not be immediately reflected in BII's monthly NAV. The resulting potential disparity in BII's NAV may inure to the benefit of shareholders whose shares are repurchased or new purchasers of BII's shares, depending on whether BII's published NAV per share of such class is overstated or understated.

BII has no employees and is dependent on the Adviser to conduct its operations. The Adviser will face conflicts of interest as a result of, among other things, the allocation of investment opportunities among BII and other Brookfield funds and accounts, the allocation of time of its investment professionals, and the substantial fees that BII will pay to the Adviser.

This is a "best efforts" offering. If BII is not able to raise a substantial

amount of capital in the near term, its ability to achieve its investment objectives could be adversely affected.

There are limits on the ownership and transferability of BII's shares.

BII's operating results will be affected by global and national economic and market conditions generally and by the local economic conditions where its investments are located.

BII is not managed in reference to any benchmark index.

FORWARD-LOOKING STATEMENTS

Information herein contains, includes or is based on forward-looking statements. Forward-looking statements include all statements, other than statements of historical fact, that address future activities, events, or developments, including without limitation, business or investment strategy or measures to implement strategy, competitive strengths, goals, expansion and growth of our business, plans, prospects and references to our future success. You can identify these statements by the fact that they do not relate strictly to historical or current facts. Words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "seek" and other similar words are intended to identify these forward-looking statements. Forward-looking statements can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining our actual future results or outcomes. Consequently, no forward-looking statement can be guaranteed. Our actual results or outcomes may vary materially. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

Unless stated otherwise, photos are of assets currently in the BII portfolio.

Brookfield Infrastructure Income Fund (“BII”)

A global infrastructure portfolio that seeks to provide resilient and stable returns

✓ **Platform:** access to Brookfield’s leading Infrastructure, Renewable Power & Transition Capabilities

✓ **Portfolio:** Immediate exposure to a diversified, high-quality private infrastructure portfolio

✓ **Product Structure:** Monthly subscriptions, quarterly liquidity, and reported on an Annual Form 1099-DIV¹

✓ **Market Opportunity:** Infrastructure Supercycle² driven by digitalization, decarbonization & deglobalization themes

Global infrastructure investment required over the next 30 years³

U.S. Hydro (Smoky Mountain)

As of June 30, 2025.

1. Distributions are authorized by the Fund’s board of directors and are not guaranteed. Liquidity is only provided through the Fund’s share repurchase plan, which has quarterly limits and may be suspended. The Fund intends, but is not obligated, to conduct quarterly tender offers for up to 5.0% of its outstanding Shares at the applicable NAV per share as of the applicable valuation date. Any repurchase of Shares from a shareholder that were held for less than one year (on a first-in, first-out basis) will be subject to an “Early Repurchase Fee” equal to 2% of the NAV.
2. A Supercycle is defined as a sustained period of expansion, usually driven by robust growth in demand for products and services. See important information for additional information. There is no assurance that similar investments or results will occur in the future. Economic, market, and operational challenges may impact value creation initiatives. Risks include capital structure optimization, cost overruns, regulatory limitations, and operational efficiencies. Market conditions may affect exit valuations.
3. Source: Brookfield internal research.

Why invest in infrastructure?

Infrastructure has historically proven resilient, which may make the asset class an appealing investment choice across market conditions¹

Essential Services

Investments may increase or hold value even in recessionary environments, with low risk of obsolescence over the long-term

Attractive Cash Yield

Stable and predictable income with large percentage of returns from cash distributions

Inflation Protection

Inflation indexed revenue growth or cost pass through provide a natural hedge against rising liabilities

Lower Volatility²

Regulated/contracted cash flows from mature operating assets

Portfolio Diversification³

Historically low correlation with traditional listed investments

Stability of Returns¹

Infrastructure has historically maintained positive performance in market downturns

There is no assurance that similar investments or results will occur in the future.

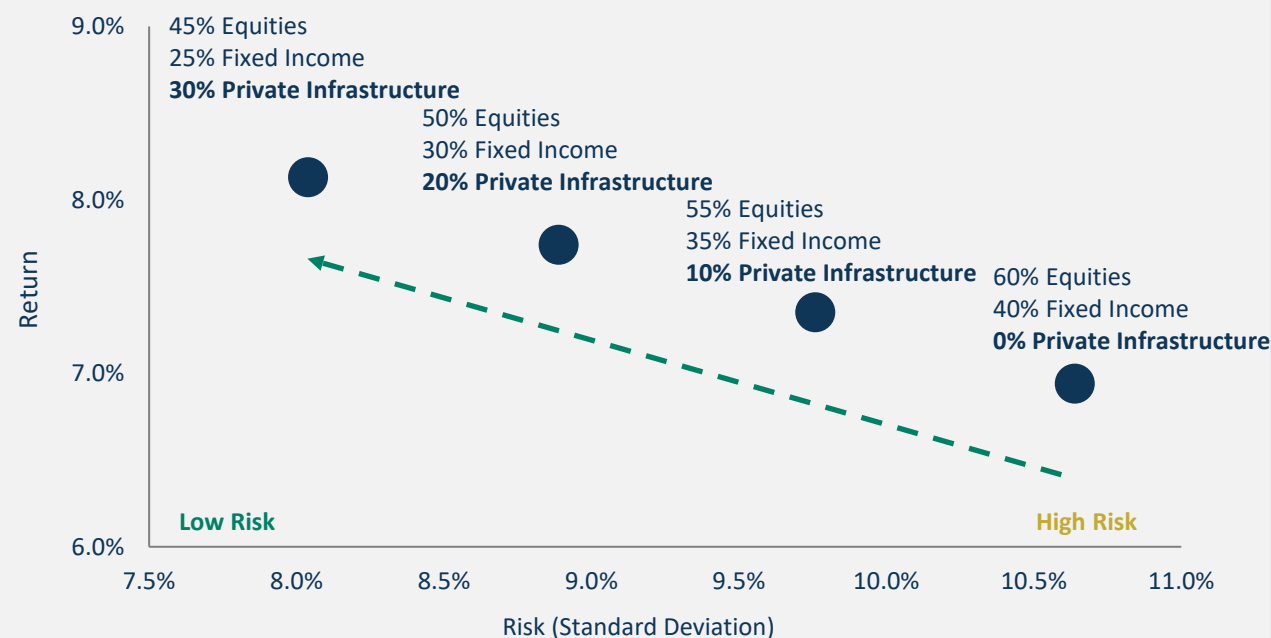

1. Based on Brookfield internal research. The information provided herein reflects Brookfield's perspectives and beliefs. Any conclusions provided herein are based on various assumptions, any of which may prove to be incorrect. Investors should consult with their advisors prior to making an investment in any fund, including a Brookfield-sponsored fund. Please refer to the Notice to Recipients for additional information related to Brookfield's internal research.
2. Relative to unregulated or uncontracted assets.
3. Diversification does not assure a profit or protect against loss in a declining market.

Infrastructure may help build more resilient portfolios

Historically has maintained positive performance in market downturns, providing stability to a portfolio and higher returns over time

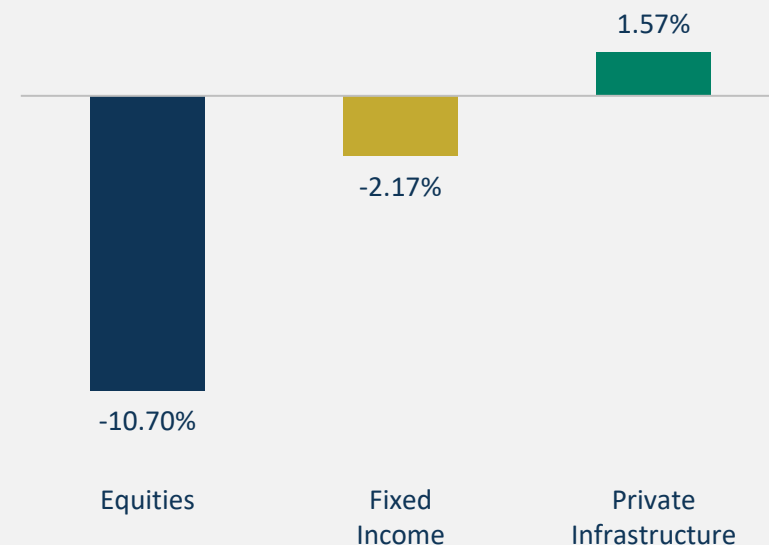

Private Infrastructure Has Historically Enhanced Performance

Annualized Returns and Standard Deviations at Various Allocations to Private Infrastructure¹

Downside Risk Mitigation

Average Quarterly Returns During 10 Worst Quarters for Equity Markets

Past performance is not indicative of future results. There is no assurance that similar investments or results will occur in the future. For the period January 1, 2010 through December 31, 2024. Source: Bloomberg; Preqin. Equities refers to MSCI World Index; Fixed Income refers to the Bloomberg Global Aggregate Index; Private Infrastructure refers to the Preqin Infrastructure Index. See disclosures for full index definitions. The indexes are unmanaged and cannot be purchased directly by investors. Index performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be limitations to the data provided given limited coverage, reporting lag and different valuation methodologies. Further, private infrastructure funds that are included in the index choose to self-report. Thus, the index is not representative of the entire private infrastructure universe and may be skewed towards those funds that generally have higher performance. Over time, funds included and excluded based on performance, may result a “survivorship bias” that can result in a further misrepresentation of performance. 1.Risk is defined as annualized standard deviation. Please see disclosures for additional information.

As of June 30, 2025. Source: Brookfield. There is no assurance that similar investments or results will occur in the future. 1. Total Asset Value is measured as the gross asset value of private infrastructure equity investments, private infrastructure debt investments and public securities measured at fair value plus cash, short-term investments and other working capital assets. 2. Represents private investments and does not include public securities. 3. As of March 31, 2025. Excludes private debt investments and public securities. 4. As of March 31, 2025. Represents the ratio of all fixed rate debt to total debt across the Fund's private infrastructure equity investments. 5. Asset Allocation is measured as the gross asset value of each asset category (private infrastructure equity and debt investments and public securities) against the total gross asset value of private infrastructure equity investments, private infrastructure debt investments and public securities. Private infrastructure equity investments include preferred equity investments. Public securities include public infrastructure debt securities, term deposits and cash equivalents. Committed capital reflects the expected capital deployment based on private investments that have been signed or are in the closing stages. Allocations are subject to change. 6. Sector and Geography is measured as the gross asset value of each private asset category (private infrastructure equity and debt investments) against the total gross asset value of private infrastructure equity investments and private infrastructure debt investments.

Cumulative Monthly Performance²

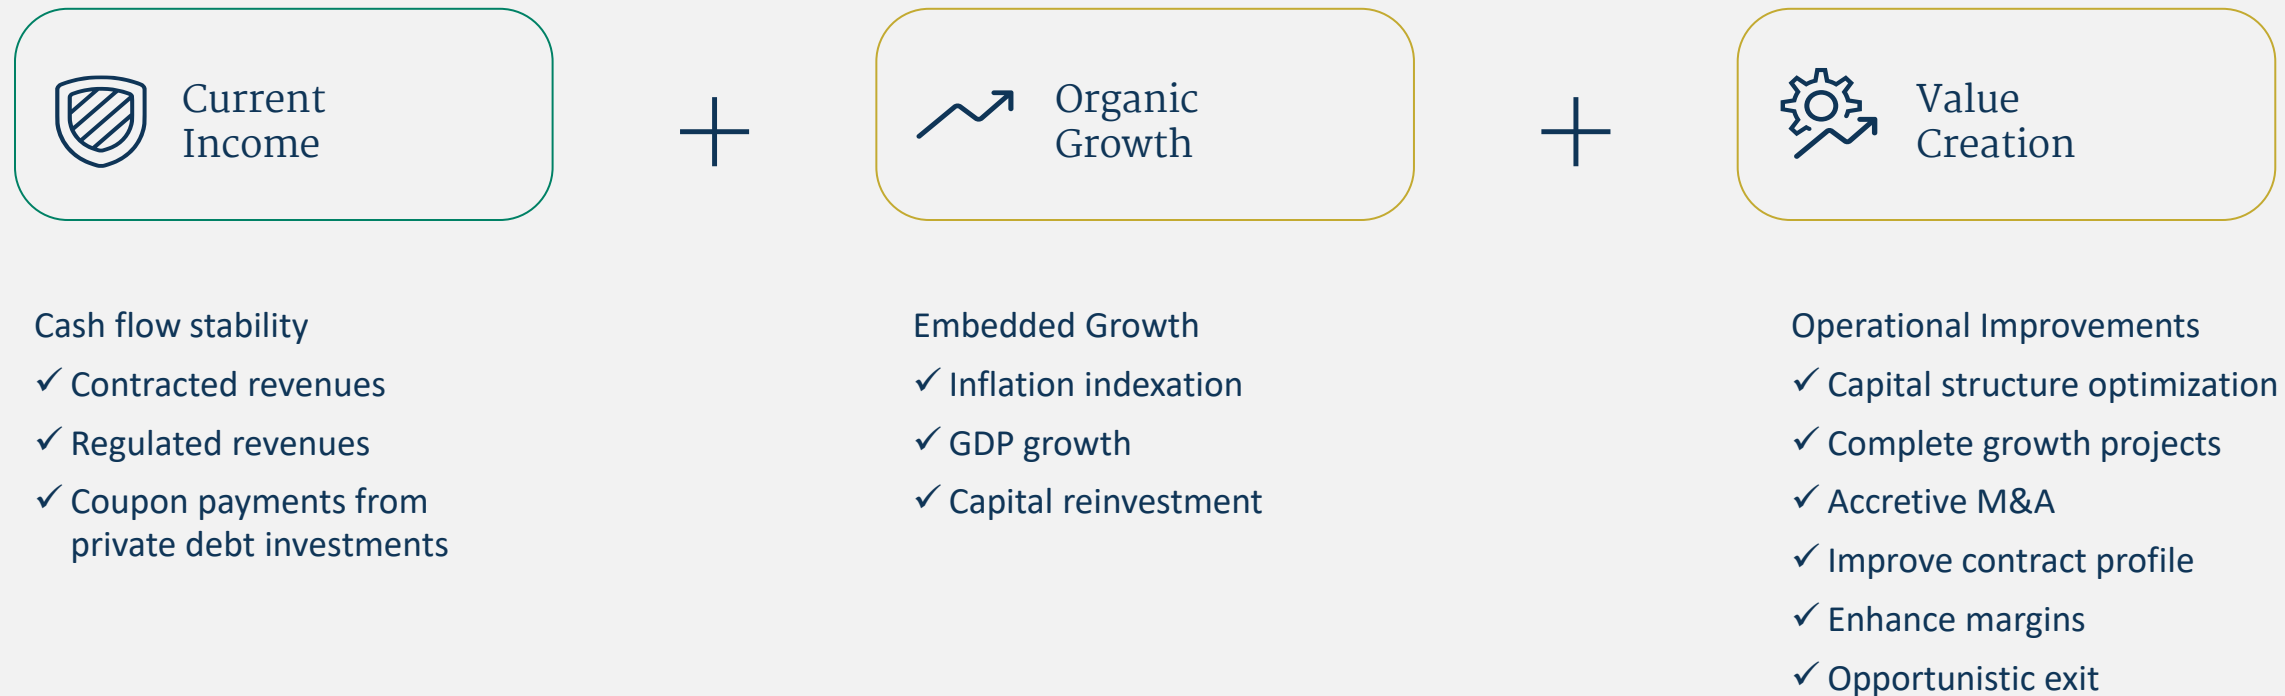

Source: Brookfield.

- Returns greater than one year are annualized. **Performance data quoted represent past performance; past/prior performance does not guarantee, and is not indicative of, future results.** The investment return and principal value of an investment will fluctuate, so an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. The investment records provided are illustrative only and should not be taken as an indication of BII's expected or actual performance or future rates of return. There can be no guarantee that BII will achieve comparable returns to those illustrated on this page, or at all. Potential investors should place no reliance on this illustrative information. Please refer to the Fund's prospectus and sub-fund supplement and to the key information document prepared (if applicable) in respect of it before making any final investment decisions. Total Return is calculated as the percentage change in the NAV per share, from the beginning of the applicable period, plus the amount of any net distribution per share declared in the period. Total return is not a measure used under U.S. GAAP. Total return is calculated after all expenses, including management and trail fees, where applicable. All returns shown are net of all BII expenses, including general and administrative expenses, transaction-related expenses, management fees, incentive fees and share-class-specific fees.
- Distribution Rate: Reflects the current month's distribution annualized and divided by the prior month's NAV. Future distributions are not guaranteed and may be sourced from sources other than cash flows from operations. Equities refers to MSCI World Index; Fixed Income refers to the Bloomberg Global Aggregate Index. BII's volatility and Sharpe ratio calculations are based on less frequent valuations (monthly/quarterly) of illiquid assets, which minimizes volatility compared to the daily-priced public benchmarks. The functional currency of BII is USD (\$). Note that where the functional currency of a fund differs from USD, an investor's return will be subject to exchange rate fluctuation risk.
- Inception date is November 1, 2023.
- There may be material factors relevant to any such comparison such as differences in the volatility between the indexes shown and the Fund. Equities refers to MSCI World Index; Fixed Income refers to the Bloomberg Global Aggregate Index.
- Volatility is calculated as the annualized standard deviation of monthly returns since inception, expressed as a percentage.

Value creation and operational improvement examples

Transport

Triton | Global Container Network

- ✓ Optimize capital structure
- ✓ Improve fleet utilization
- ✓ Secure improved rates on longer contracted leases

Renewable Power

Neoen | Renewable Power Operator & Developer

- ✓ Optimize capital structure
- ✓ Increase generation capacity of existing assets
- ✓ Scale development pipeline
- ✓ Implement asset recycling strategy

Transition

Westinghouse Electric Company | Nuclear Services

- ✓ Optimize capital structure
- ✓ Expand presence by securing new and renewing existing contracts

Utilities

FirstEnergy Transmission | U.S. Utility

- ✓ Optimize capital structure
- ✓ Implement initiatives to modernize and decarbonize the grid

Midstream

Inter Pipeline | Canadian Midstream

- ✓ Pursue long-term customer contracts and renewals
- ✓ Enhance liquids extraction capabilities to drive margins and efficiency

Data

GD Towers | Telecom Towers

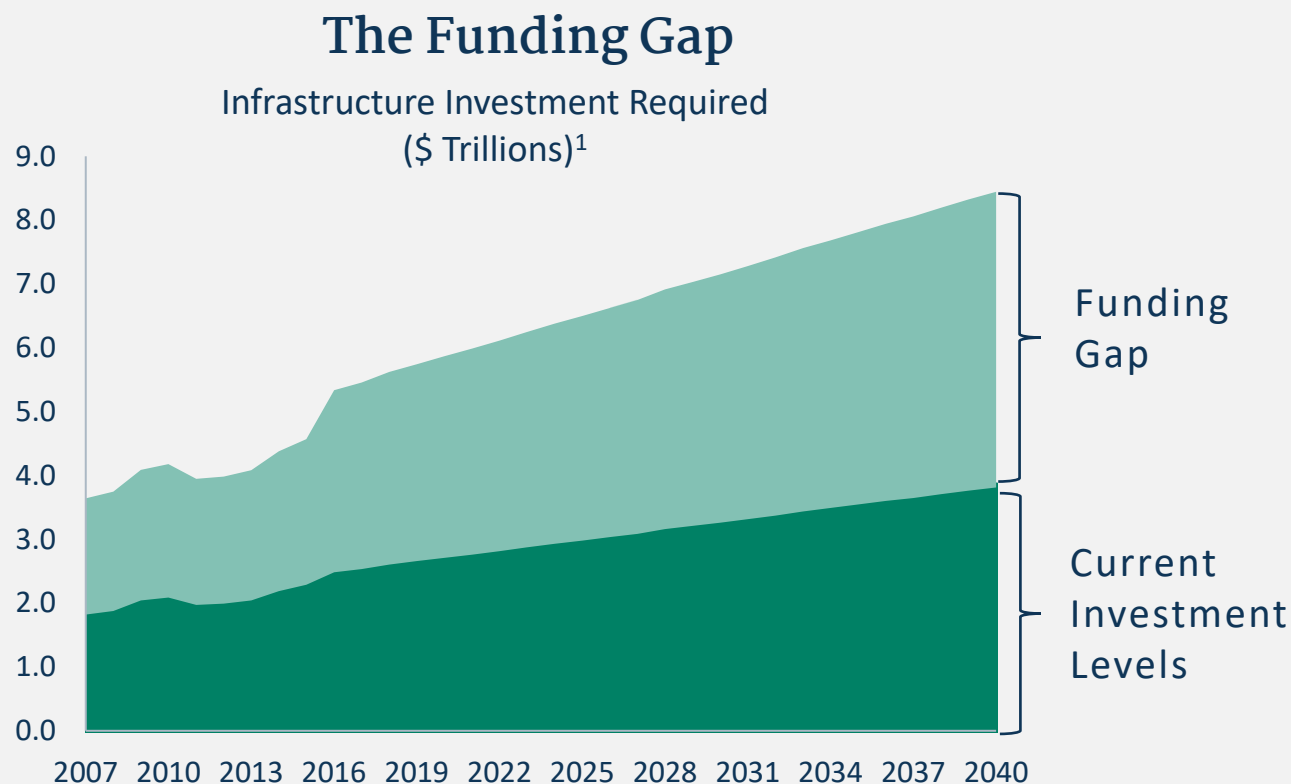

- ✓ Optimize capital structure
- ✓ Develop and execute on cost optimization
- ✓ Deliver on building more built-to-suit towers
- ✓ Enhance contracting profile

Class D	Without Sales Load	0.62%	3.89%	7.97%	7.93%	3/1/2024	4.00%
	With Sales Load	-1.36%	1.82%	5.77%	6.34%		

Performance data quoted represent past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 844.915.0238.

Total Return is calculated as the percentage change in the NAV per share, from the beginning of the applicable period, plus the amount of any net distribution per share declared in the period. Total return is not a measure used under U.S. GAAP. Returns greater than one year are annualized. Total return is calculated after all expenses, including management and trail fees, where applicable. All returns shown are net of all BII expenses, including general and administrative expenses, transaction-related expenses, management fees, incentive fees and share-class-specific fees.

Distribution Rate: Reflects the current month's distribution annualized and divided by the prior month's NAV. Future distributions are not guaranteed and may be sourced from sources other than cash flows from operations.

BII Monthly Total Returns

As of June 30, 2025

		Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD
Class I	2023	–	–	–	–	–	–	–	–	–	–	0.70%	0.77%	1.48%

Performance data quoted represent past performance; past/prior performance does not guarantee, and is not indicative of, future results. The investment return and principal value of an investment will fluctuate, so an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. The investment records provided are illustrative only and should not be taken as an indication of BII's expected or actual performance or future rates of return. There can be no guarantee that BII will achieve comparable returns to those illustrated on this page, or at all. Potential investors should place no reliance on this illustrative information. Please refer to the Fund's prospectus and sub-fund supplement and to the key information document prepared (if applicable) in respect of it before making any final investment decisions.

Total Return is calculated as the percentage change in the NAV per share, from the beginning of the applicable period, plus the amount of any net distribution per share declared in the period. Total return is not a measure used under U.S. GAAP. Total return is calculated after all expenses, including management and trail fees, where applicable. All returns shown are net of all BII expenses, including general and administrative expenses, transaction-related expenses, management fees, incentive fees and share-class-specific fees. Distribution Rate: Reflects the current month's distribution annualized and divided by the prior month's NAV. Future distributions are not guaranteed and may be sourced from sources other than cash flows from operations.

The functional currency of BII is USD (\$). Note that where the functional currency of a fund differs from USD, an investor's return will be subject to exchange rate fluctuation risk.

Summary of Terms¹

Structure	The Fund is a continuously offered, non-diversified, unlisted closed-end management investment company that is structured as a “tender offer fund”				
Adviser	Brookfield Asset Management PIC Canada, L.P. (Adviser) Brookfield Public Securities Group LLC (Sub-Adviser)				
Investment portfolio	Target ~80-90% in private infrastructure investments and ~10-20% in a liquid portfolio (public securities, term deposits and cash)				
Suitability	Financial intermediaries may impose certain suitability standards				
Share classes and Fee Structures ²	Share Class	Minimum Initial Investment	Maximum Front-End Sales Load (as a percentage of the offering price) ³	Distribution and/or Shareholder Servicing Fees	Minimum Subsequent Investment
	I (Advisory)	\$1,000,000	N/A	N/A	\$500
	S (Brokerage)	\$2,500	Up to 3.50%	0.85%	\$500
	D (Brokerage)	\$2,500	Up to 2.00%	0.25%	\$500
NAV frequency and subscriptions ⁴	Monthly				
Distributions ⁵	Monthly (not guaranteed, subject to board approval)				
Liquidity / Periodic repurchase offers ⁶	The Fund intends, but is not obligated, to conduct quarterly tender offers for up to 5.0% of its outstanding Shares at the applicable NAV per share as of the applicable valuation date. Any repurchase of Shares from a shareholder that were held for less than one year (on a first-in, first-out basis) will be subject to an “Early Repurchase Fee” equal to 2% of the NAV of any Shares repurchased by the Fund that were held for less than one year.				
Management fee ⁷	1.25% per annum on NAV				
Incentive Fee ⁸	12.5% of fund income				
Tax Reporting	Form 1099-DIV				

Please refer to the Prospectus of BII and to the key information document prepared (if applicable) in respect of it before making any final investment decisions.

1. Please note certain broker dealers may impose different standards and terms. Terms summarized herein are for informational purposes and qualified in their entirety by the more detailed information set forth in the Fund’s prospectus. You should read the prospectus carefully prior to making an investment. There can be no assurance that the Fund will be able to implement its investment strategy or achieve its investment objectives.
2. Please note certain broker dealers may impose different standards and terms. Please refer to the Fund’s prospectus for further details of share classes and fees.
3. Any additional commissions or other forms of compensation paid to a broker or financial intermediary on sales of Class S Shares, and Class D Shares are not reflected in the offering price. The selling agents may, in their sole discretion and subject to applicable law, reduce or waive the front-end sales load on a non-scheduled basis in individual cases. Class I Shares are not subject to a front-end sales load; however, investors could be required to pay brokerage commissions on purchases and sales of Class I Shares to their selling agents. Investors should consult with their selling agents about the sale load and any additional fees or charges their selling agents might impose on each class of Shares.
4. The Fund may offer shares at a price that the Fund believes reflects the NAV per share of such common stock more appropriately than the prior month’s NAV per share, including by updating a previously disclosed offering price, in cases where the Fund believes there has been a material change (positive or negative) to the Fund NAV per share since the end of the prior month.
5. There is no assurance the Fund will pay distributions in any particular amount, if at all. Any distributions the Fund makes will be at the discretion of the Fund’s board of directors. The Fund may fund any distributions from sources other than cash flow from operations, including, without limitation, the sale of assets, borrowings, return of capital or offering proceeds, and the Fund has no limits on the amounts the Fund may pay from such sources.
6. Liquidity is only provided through the Fund’s share repurchase plan, which has quarterly limits and may be suspended.
7. Pursuant to the Advisory Agreement, the Adviser receives a Management Fee payable quarterly in arrears and calculated monthly at the annual rate of 1.25% of the value of the Fund’s net assets, which is calculated as of the close of business on the last business day of each month.
8. Pursuant to the Advisory Agreement, the Adviser receives an Incentive Fee accrued monthly and payable annually in arrears in an amount equal to 12.5% of the Fund income for the applicable year.

Disclosures

A fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling 855.777.8001 or visiting www.brookfieldoaktree.com. Read the prospectus carefully before investing. Investing involves risk, and principal loss is possible.

No Assurance of Investment Return. The Adviser cannot provide assurance that it will be able to successfully implement the Fund's investment strategy, or that Portfolio Investments (as defined in the Prospectus) will generate expected returns. Moreover, the Adviser cannot provide assurance that any shareholder will receive a return of their capital or any distribution from the Fund. No organized secondary market is expected to develop for the shares of the Fund, and liquidity for the shares is expected to be provided only through quarterly tender offers of the shares at NAV per share. **Past performance of investment entities associated with Brookfield, the Adviser or its investment professionals is not necessarily indicative of future results or performance, and there can be no assurance that the Fund will achieve comparable results. Accordingly, investors should draw no conclusions from the performance of any other investments of Brookfield or the Adviser, and they should not expect to achieve similar results.** An investment in the Fund involves a risk of partial or total loss of capital and should only be considered by potential investors with high tolerance for risk.

The Portfolio Investments will be subject to the risks incidental to the ownership and operation of infrastructure projects, including risks associated with the general economic climate, geographic or market concentration, the ability of the Fund to manage the Portfolio Investment, government regulations and fluctuations in interest rates. Since investments in infrastructure securities, like many other types of long-term investments, have historically experienced significant fluctuations and cycles in value, specific market conditions may result in occasional or permanent reductions in the value of the Portfolio Investments. Such specific market conditions could include, but are not limited to, the following: (i) demand for commodities, such as natural gas or minerals; (ii) impact of alternative technologies on our business, and cyber security

attacks; (iii) ability to successfully identify, complete and integrate acquisitions; (iv) competition with other market participants; (v) construction or expansion or projects, environmental damage and future capital expenditures; (vi) economic regulation and adverse regulatory decisions in the countries in which we operate, including nationalization or the imposition of new taxes; (vii) supply chain disruptions; and (viii) adverse claims or governmental rights or governmental rights asserted against the lands used for our infrastructure assets.

Quasar Distributors, LLC is the distributor of Brookfield Infrastructure Income Fund Inc. This communication may not be distributed in whole or in part to any natural or corporate person without express written consent. This communication is not intended to, and does not constitute an offer or solicitation to sell or a solicitation of an offer to buy any security, product, investment advice or service (nor shall any security, product, investment advice or service be offered or sold) in any jurisdiction in which Brookfield Oaktree Wealth Solutions LLC or any other applicable affiliate of Brookfield Asset Management LLC is not licensed to conduct business, and/or an offer, solicitation, purchase or sale would be unavailable or unlawful. No offer or sale of any security, product or fund may be made except in accordance with the prospectus, offering memorandum and/or other disclosure document applicable to such security product and/or fund.

The index sponsors have no liability for any direct, indirect, special, incidental, punitive, consequential or other damages (including loss of profits). The index sponsors do not sponsor, endorse or recommend Brookfield or any of its products or services. Unless otherwise noted, all indexes are total -return indexes.

Definitions

The Bloomberg Global Aggregate Index is a market-capitalization-weighted index comprising globally traded investment-grade bonds. The index includes government securities, mortgage-backed securities, asset-backed securities and corporate securities to simulate the universe of bonds in the market. The maturities of the bonds in the index are more than one year.

The Preqin Indexes represents a horizon calculation based on data compiled from infrastructure funds, including fully liquidated partnerships.

Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services.

The MSCI World Index is a free float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of developed markets.
