A fund's investment objectives, risks, changes and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling +1 (212) 549-8380 or visiting www.brookfieldoaktree.com. Please read the prospectus carefully before investing. Investing in the Fund involves risk. Principal loss is possible. There can be no assurance that the Fund will achieve its investment objective.

The Fund invests in renewable and sustainable infrastructure companies, which may be subject to a variety of factors that may adversely affect their business, including high interest costs, high leverage, regulation costs, economic slowdown, surplus capacity, increased competition, lack of fuel availability and energy conservation policies. The Fund invests in small and mid-cap companies, which involve additional risks such as limited liquidity and greater volatility. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are magnified in emerging markets. Some securities held may be difficult to sell, particularly during times of market turmoil. If the Fund is forced to sell an illiquid asset to meet redemption, the Fund may be forced to sell at a loss. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Debt securities rated below investment grade are commonly referred to as "junk bonds" and are generally more volatile, less liquid, and considered speculative. Since the Fund will invest more than 25% of its total assets in securities in the Renewables and Sustainable Infrastructure industry, the Fund may be subject to greater volatility than a fund that is more broadly diversified.

Effective May 20, 2025, Brookfield Global Renewables and Sustainable Infrastructure UCITS Fund was renamed Brookfield Next Generation Infrastructure UCITS Fund. There was no change to the Fund's investment objectives or policy as a result of the name change. Please refer to the Fund's prospectus and supplement.

The S&P Clean Energy Transition Index is designed to measure the performance of companies in global clean energy-related businesses from both developed and emerging markets, with a target constituent count of 100. The FTSE Global Core Infrastructure 50/50 Index gives participants an industry-defined interpretation of infrastructure and adjusts the exposure to certain infrastructure sub-sectors. The constituent weights are adjusted as part of the semi-annual review according to three broad industry sectors - 50% Utilities, 30% Transportation including capping of 7.5% for railroads/railways and a 20% mix of other sectors including pipelines, satellites and telecommunication towers. Company weights within each group are adjusted in proportion to their investable market capitalization. The MSCI World Index is a free float-adjusted market capitalization weighted index designed to measure equity market performance of developed markets. Indexes are not managed and an investor cannot invest directly in an index. Index performance is shown for illustrative purposes only and does not predict or depict the performance of the Fund.

The Fund has, after review by the Belgian Central Agency, met the quality standards for use of the "Towards Sustainability" label. The "Towards Sustainability" label is a quality standard that aspires to increase the level of socially responsible and sustainable financial products, and to mainstream its principles towards traditional financial product. The "Towards Sustainability" initiative wants to help investors looking for more sustainable savings and investment solutions. Also, it wants to encourage financial institutions to offer a diverse and qualitative range of sustainable products. The "Towards Sustainability" label aims to instill trust and reassure potential investors that the financial product is managed with sustainability in mind and is not exposed to very unsustainable practices, without requiring of investors to do a detailed analysis themselves. The label is awarded and administered by the Central Labeling Agency (CLA) of Belgian SRI label developed on the initiative of Febelfin. For more information on the Towards Sustainability initiative and label, please visit www.towardsustainability.be. The Central Labelling Agency (CLA) assumes no responsibility and shall not be liable for the non-compliance with applicable rules and regulations regarding, among others but not limited to, the marketing of financial instruments by a product provider, a financial institution or any other market participant or party who uses the 'Towards Sustainability' label." The Fund was awarded a AA ESG rating from MSCI. This rating is awarded to leaders in adopting ESG investment principles. Each strategy scores a rating on a scale from CCC (laggard) to AAA (leader). The rating is based first on the weighted average score of the holdings of the strategy. MSCI then assess ESG momentum to gain insight into the fund's ESG track record, which is designed to indicate a strategy's exposure to holdings with a positive rating trend or worsening trend year over year. Finally, MSCI reviewing the ESG tail risk to understand the fund's exposure to holdings with worst-of-class ESG Ratings of B and CCC. The rating was published in June 2020 and will be reviewed on an annual basis. ©MSCI Inc. MSCI ESG Research is an independent provider of ESG data, reports and ratings based on published methodologies and available to clients on a subscription basis. The Fund was awarded a Silver 3D rating by 3D Investing in August 2024. To achieve this rating, a fund will have a reasonably high exposure to activities that are classified as solutions under the 3D framework and possess sustainable characteristics, minimal exposure to harmful impact activities, as well as minimal exposure to activities with controversies associated with them.

* This Fund is classified under Article 9 of the EU Sustainable Finance Disclosure Regulation. Article 9 applies to products which, alongside their financial investment objectives, have specific investment objectives to invest sustainably. For further information, please see the Fund's Prospectus.

¹ Represents data for Class E since inception. Standard deviation measures the degree to which an investment's return varies from its mean return. Tracking error measures the difference between a portfolio's returns and its benchmark. Sharpe ratio is a measure of the excess return to the risk-free rate (or risk premium) per unit of risk (measured by standard deviation) in an investment asset or a trading strategy.
